Replacement Filter: (A) Pleated Pre-Filter

- Sediment filter to remove big particles like sands and muds.
- Pleated technology for bigger filtration surface and more effective filtration.
- Replacement: Every 3-6 months*

(B) Ultrafiltration Membrane Pre-Filter

- Ultrafiltration Membrane filter to remove smaller particles up to 0.01micron.
- 99.99% effective removal of bacteria, algae and some viruses while preserving good mineral.
- Replacement: Every 3-6 months*

(C) UltraHi Capacity Active Carbon Block with Scale Inhibitor

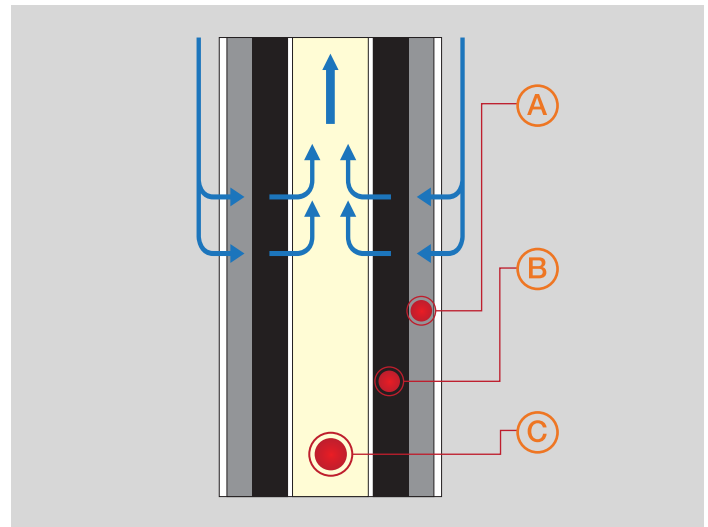

- Remove cysts, unpleasant odours, chlorine, chloramine, trihalomethane, VOCs and heavy metals.
- Reduce the rate of scale formation.
- Replacement: 50,000L or every 3-6 months whichever comes first.

* Depends on varying water quality.

Boox

Instantaneous Water Heater

Features and Benefits

ZERO Water Ingress

Double safety assurance with specially designed inlet tunnel and auto drainage that eliminates the risk of water ingress into the internal of the heater.

All in One Hydraulic Structure

Simplicity in hydraulic structure design that gives easy installation and worry-free maintenance.

IPX5 Splash Proof

Designed and built with splash-proof safety standard that protects the internal circuits from water.

Energy & Water Saving

Saves electricity and water cost as the heater only heats up the water when in use.

Earth Leakage Safety Device (ELSD)

Safety device that cuts off both live and neutral line completely in case of electricity leakages to prevent electric shock.

Non Flammable Material Compliance

Self extinguish, non-combustible material for external casing

Anti-Scald Safety Device

Prevents water temperature from reaching scalding level and permanently cuts off power to the heater when temperature reaches abnormal level.

High Precision Power Selector

Provides easy and precise control over the water temperature.

Riio

Single Point Instantaneous Water Heater

Safety Points

9X Built-in Safety Measures for peace of mind usage:

- 1. Electronic RCD (Residual-Current Device)**
 - Once electrocution currents detected, it will cut power off immediately.
- 2. IP25 Splash Proof Compliance**
 - Enclosed design to prevent ingress of water and access of hazardous parts with finger and foreign objects.
- 3. Anti-Scald System**
 - Cut off power supply if water temperature exceeds hazard limit of 55.
- 4. Non Conductive PVC Hose**
 - To prevent current leakage.
- 5. Non-Flammable Heater Tank**
 - Made of UL-94-VO material that is self extinguish, non-combustible, superior for prevention of fire.
- 6. Anti-Leak Tank**
 - Able to withstand high water pressure in case of sudden surge of water pressure.
- 7. Lightning & Surge Protection**
 - Protect against lightning strikes and current leakage.
- 8. Adjustable Pump Speed & Pump Activator**
- 9. RCD Test Function**
